

## ADVANCED PRODUCT QUALITY PLANNING (2<sup>nd</sup> EDITION)

Advanced Product Quality Planning (APQP) has now been revised to 2<sup>nd</sup> Edition and is in-force. While revising, the guidelines given therein are now supporting the requirements of ISO/TS 16949:2002 mainly "Customer Focused Approach" including customer specific requirements. The purpose of this Training is to assist Cross Functional Teams (CFT) / Quality Planning Teams (QPT) in developing appropriate communication forms to support meeting customer requirements, needs and their expectations.

**Main Objective of this 1-day Training Program is to:**

LEADS TO DEFECT PREVENTION

- Learn the Best practices of early planning for "New Products Developments".
- Reduce complexity of "Product Quality Planning" and anticipating the problems before hand, if any.
- Upfront Planning, ensuring to define the tasks and bringing clarity including adequate communication within different process owners, (i.e. "Who" is to do "What" and till "When" they should complete the same, including the regular follow-up)
- Organize ideas to build clarity in timely and systematically meeting the customer requirements.
- The act of implementation and to understand if customer is satisfied including pursuit for further continual improvement

ADVANCED PRODUCT
